Product Introductions

Page 3  UNISTRUT® Metal Framing
Unistrut Metal Framing is the original strut system offering a time and money saving alternative to conventional support methods. The Unistrut system eliminates welding and drilling, and is easily adjustable, demountable and reusable.

Page 4  TELESPAR® Telescopic Tubing
Perforated, four-sided Telespar Telescopic Tubing makes quick work of hundreds of support applications, without special tools, welding or assembly. Self-aligning dimpled fittings and telescoping action provide fast assembly and repeatable, incremental adjustment.

Page 4  TELESTRUT® Telescopic Tubing
Telestrut is a perfect compliment to the Unistrut metal framing system. It’s the only telescoping system that offers both infinite and incremental adjustability. Five connection methods include a boltless universal rivet that can cut assembly time in half.

Page 5  PRIME-ANGLE™ Slotted Angle System
PrimeAngle™ is a complete slotted angle support system that’s versatile, economical and easy-to-use. With the standard 10’ and 12’ lengths, three strengths and two finishes, PrimeAngle meets a wide range of support needs and requires only a 3/16” wrench for assembly.

Page 5  UNITED INTERLOCK® Grating System
Engineered with a high strength-to-weight ratio, these multi-use planks can be carried by one person. United Interlock Grating installs easily with a snap-together friction fit that minimizes welding and bolting, providing overall cost savings of up to 60% over other materials.

Page 20  Product Pictorials
Unistrut Metal Framing is the original strut system offering a time and money saving alternative to conventional support methods. The Unistrut system eliminates welding and drilling, and is easily adjustable, demountable and reusable.

Featuring The Unique Unistrut Connection
- No Welding
- No Drilling
- 100% Adjustable
- 100% Reusable

Hex-head bolt threads easily into a spring nut, connecting fitting to channel in a quick one-hand operation.

When the nut is tightened against the inturned edges, the nut teeth create a vise-like grip, tying sides together in a strong "box" configuration.

Spring allows precision placement anywhere along channel length, then holds the nut in position while connection is completed.

Fifteen channel sizes and hundreds of fittings give you engineered solutions to a virtually limitless variety of projects.

1. Insert the spring nut anywhere along the continuous slotted channel. Rounded nut ends permit easy insertion.

2. A 90° clockwise turn aligns the grooves in the nut with the inturned edges of the channel. Fittings can be placed anywhere along the channel opening.

3. Insert bolt through fitting and into the spring nut.

4. Additional channel sections can now be bolted to the fitting already in place by using steps 1-3.

5. Tightening with a wrench locks the serrated teeth of the nut into the inturned edges of the channel, forming a strong, vise-like connection.
TELESPAR® Telescopic Tubing

*Product Introduction*

Looking for this icon to identify Telespar applications throughout this brochure.

The engineered four-sided tubing system that carries a heavy load... 1,001 different ways.

Telespar Telescopic Tubing perforated sections are available in eight sizes from 1" to 2½" square. Perforated sections feature holes on all four sides, spaced on one-inch centers. Sections without holes are also available. Versatile, adjustable and reusable, Telespar Tubing offers design flexibility as well as important savings in time and labor costs.

Available in 10, 12 and 14 gauge steel, with a complete line of fittings, fasteners and accessories, Telespar lets you create new designs in hundreds of applications. From racks and interior partitions to adjustable platforms, hangers and sign supports, you can build them all without special welding, tools, or assembly skills.

TELESTRUT® Telescopic Tubing

*Product Introduction*

Looking for this icon to identify Telestrut applications throughout this brochure.

Three-sided channel and four-sided tubing, working together in one powerful support system.

By joining infinitely-adjustable three-sided channel with incrementally adjustable, pre-punched four-sided tubing, the Telestrut system can be telescoped, spliced, adjusted and re-used faster and easier than anything in its class. So you can design, build and change support structures faster...and better...than you ever thought possible.

Efficient assembly with no welding, drilling or other time-consuming fabrication, plus five different fastening options...including a rivet system for super-fast boltless fastening...provides maximum project power. Other fasteners include the Unistrut spring nut and bolt, standard through-bolts and for temporary connections, a removable, self-locking gravity pin.
PRIME-ANGLE™ Slotted Angle System

Product Introduction

Look for this icon to identify PrimeAngle applications throughout this brochure.

A complete support system that's versatile, economical, & easy to use.

- No drilling, welding or special tools necessary.
- Fast, efficient bolt-together construction.
- Easy to change and adjust.
- Cost-saving reusable materials.

With its standard 10' and 12' lengths, three strengths and two finishes, this Slotted Angle System fills a wide range of support needs and requires only a 9⁄16” wrench for assembly. Available in pre-galvanized and acrylic green finishes.

UNITED INTERLOCK® Grating System

Product Introduction

Look for this icon to identify United Interlock applications throughout this brochure.

The snap-together plank grating with a high strength-to-weight ratio... for well-built projects that come together quickly.

Strong, lightweight, economical, and versatile, United Interlock Grating Systems provide important economy and safety advantages wherever people walk. When combined with our metal framing systems, United Interlock planks are ideal for racks and other material handling applications.

The planks snap together with positive friction so welding and bolting is minimized. United Interlock planks can be easily cut to size, shape and angle at the jobsite.

United Interlock planks are available in 6", 9", and 12" widths, standard lengths of 20' and 24' with special lengths up to 30'. Two material gauges and three leg heights meet a wide range of load, space and budget requirements.
Storage racks like the one shown here are one of the earliest and most common applications for Unistrut metal framing. There are several advantages to a metal framing rack. The load capacity is determined by the channel series that is used. The shelves are fully adjustable. Just loosen the bolts that secure the fittings to the channel and you can raise or lower the shelves. Post bases can be used when the rack is placed on a concrete surface to avoid surface damage.

The simple rack is just the beginning. Our users have extended the concept in every direction, from art storage racks to complex storage systems with built in ladders.
The pipe support trapeze is another classic example of Unistrut products in action. Nearly every large building requires a support structure for pipes and conduit. The wide range of channel sizes allows you to design a support that is appropriate for the loads encountered. A major advantage of Unistrut products is that you can build around structures that are already in place. Whether you are building a pipe support trapeze, a lighting support, or a rooftop stanchion, Unistrut metal framing offers a convenient solution.
Equipment supports are often a challenge for the installer. Many items are added after construction is complete and the solution must be adapted to available space. This is where Unistrut products clearly distinguish themselves. A wide variety of channel sizes, beam clamps and fittings creates an endless variety of choices.

Inside Column Mount
Unistrut inside column mounts provide instant attachment points for small equipment like this fan.

Overhead Rectifier Support
Prefabricated back-to-back Unistrut sections provide plenty of beam strength for this heavy overhead rectifier.

Transformer Mounts
Extra size and weight are no problem for Unistrut Metal Framing. These equipment boxes were mounted quickly and easily without welding, drilling or special tools.
Equipment Transformer Support
Hundreds of fittings allow quick fabrication of custom supports, such as the heavy-duty brackets providing support for this transformer box.

Cable reel is attached directly to a Unistrut trolley, which rides along in-turned channel edges.

Trolley System
Unistrut channel sections, special fittings and ball-bearing trolleys form an ideal system for suspending mobile equipment like these pneumatic carton staplers.

Vehicle Exhaust Release System
This trolley system made from channel attached to Telespar drops, supports flexible duct attached directly to vehicle exhaust during testing and maintenance procedures.

Panel Board Support
This panel board is framed by Unistrut sections and supported on Unistrut posts, which fit into special post bases permanently anchored in concrete.
A ceiling grid can be anything from a decorative solution to a supporting structure for HVAC. The classic ceiling grid design shown here is often used for supporting ductwork, lighting and other utilities. Since the channel can be used as an electrical raceway, overhead lighting systems are often created using Unistrut metal framing.

Ceiling systems often include mezzanines and catwalks to allow easy access to the ceiling structures.
Cable tray supports are a more recent application of Unistrut products. Whether you are supporting the tray with a simple trapeze, a shelf bracket hung from a beam, or a shelf bracket attached to the wall, Unistrut channel and fittings offer a perfect solution. Cable tray systems are often forced to avoid existing structures which results in more complex support requirements. Unistrut channel offers the simple, yet flexible, method for dealing with these issues.

**Beam-Mounted Cable Tray Supports**
Cable tray is supported on a Unistrut trapeze-style hanger suspended from beam clamps.

**Wall-Mounted Cable Tray Supports**
Using conventional fastening methods, this Unistrut channel and bracket assembly is attached directly to a block wall.

**Multi-Tier Cable Tray Supports**
Because Unistrut brackets can be positioned at any point along the channel, they provide ideal supports for this multi-tier cable tray installation.

**Cable Tray Brackets**
Unistrut Metal Framing and brackets form an ideal cable tray support system where tight quarters require maximum support and flexibility in minimum space.
The UniPier Rooftop support system provides a simple and versatile way to support and manage pipe, tubing, conduit, HVAC systems, and the like. The UniPier system supports without roof surface penetration and allows the parts to remain off the surface.
Material handling encompasses a wide variety of applications. From a simple rolling cart to complex conveyor support systems. Most factories require specialized material transfer systems, tooling supports, and specialized work areas. The flexibility of Unistrut products is an ideal choice for these structures. No welding or drilling is required and Unistrut channel can accommodate a wide variety of loading conditions.

Unistrut trolleys are designed to ride on the in-turned edges of Unistrut channel, providing mobile support of up to 600 lbs. per trolley assembly.

Adjustments are made by loosening bolt connections and telescoping Telestrut sections to achieve desired dimension.

Rolling Bar-Stock Rack
This rolling bar-stock rack features cantilevered brackets that can be quickly adjusted to accommodate changing stock requirements.

Conveyor Support
This conveyor support structure, made entirely from Telestrut components, is engineered to provide infinite adjustment in both width and height, making it adaptable to a wide range of conveyor styles and sizes.

Die-Handling Trolley System
This system makes use of back-to-back Unistrut channel track sections and ball-bearing trolleys to produce an overhead support structure with movement in two directions.

Adjustable Material Stand
A gravity conveyor is supported by a multi-purpose, adjustable material stand made from Unistrut Metal Framing and Telestrut Telescoping Strut.
Unistrut products are a natural for creating specialized work platforms, tables, ladders and such. The Unistrut Interlock Grating is often a key element in the design. It provides a safe, slip-resistant walking surface that is free from the oil build-up that makes other surfaces slick.

Many times the factory maintenance staff must create specialized solutions according to a new demand. A small stock of Unistrut channel, grating and fittings and they have the basic components to tackle most of these requirement.

Rooftop Platform
United Interlock grating offered a convenient way to construct a walkway which avoids the existing piping structures.

Layout Table
This layout table, made from telescoping Telespar sections, can be raised or lowered, as needed.

Portable Platform
The portable platform is made entirely from United Interlock Grating. Sides are formed from un-punched sections, while the top surface is made with non-slip grating.

Machine Platform, Handrail
This platform made from United Interlock Grating, provides a safe, slip-resistant walking surface free from the oil build-up that can make ordinary surfaces slick and dangerous. Handrail is made from Unistrut channel.
Non-Slip Grating

This United Interlock mezzanine surface features an open, non-slip design that also prevents accumulation of spills and debris.

UNISTRUT® Rooftop Walkways & Supports

Rooftop Walkways

Preventing costly damage to roof surfaces is a major advantage of these Roofwalk® Rooftop Walkways, which provide safe access to rooftop equipment.

Rooftop Safety Walkway

Unistrut channel and United Interlock Grating are used to create a rooftop walkway with handrails. The roofwalk protects the roof and provides a safe walkway for pedestrians and workers especially when the weather is bad.

Unistrut Grating and Channel are an unbeatable team for rooftop construction projects.

Unistrut Interlock Plank Grating System provides a functional and aesthetically appealing look to all kinds of architectural applications. The galvanized gratings resist corrosion to provide a clean look that will last. The exclusive anti-skid surface provides 360° of slip resistance and makes it ideal for harsh weather environments encountered in rooftop systems.

Unistrut channel is a great companion product in this application. Ladders, handrails, and other equipment supports can be easily constructed with Unistrut channel.

1-800-694-9274
Architects have turned to Unistrut products to create specialized office and laboratory components that are functional yet aesthetically appealing. Stairs, railings, shelving, workstations can be designed to fit into the overall architecture.

**Flooring & Railings**
After climbing the Telestrut created stairway, feel safe with the Interlock Grating flooring and railings made of Telestrut.

**Awning Support**
Unistrut channel provided the necessary load support for this special awning.

**Telecom Caging**
This Telecom Security Caging System designed to meet today’s security requirements for the Internet server industry. This versatile system provides security for Internet server equipment while allowing trouble-free future modifications. Developed from our clean room wall system, this caging system offers the same versatility and adaptability features.
Steel Adjustable Framing Products & Accessories for Solar Installations

We offer the most complete and flexible support system available, supported by our national network of distributors and authorized service centers. Our system can handle any of your solar installation needs.

Solar Rooftop Support

This rooftop support is a typical channel, Telestrut & Unipier solar panel application.
From basic X-ray machines to large integrated boom systems, to complying with seismic regulations, Unistrut can design and install the support system needed to meet your requirements. The ceiling tile flanges can be installed directly on the Unistrut Metal Framing flush with the bottom of the channel opening creating a clean, unobtrusive look consistent with today’s equipment room aesthetics. Medical supports designed from Unistrut Metal framing have many advantages over conventional supporting methods including adjustability, mechanical connections, adaptability, and fast and efficient installation.

BEFORE & AFTER—Overhead Support System

The exposed interstitial grid illustrates how the equipment is supported.

The finished ceiling conceals all the support structure.
Final adjustment can be made after all components are in place, to assure precise horizontal alignment.

Overhead Support System
A Unistrut trolley system designed to support heavy equipment is suspended by heavy-duty adjustable drops fabricated from Telespar tubing.

Equipment Boom & Light Support Systems
Unistrut metal framing is often used for medical support systems that meet today’s demanding equipment supporting and facility requirements.

Therapy Support Systems for Children’s Rehab Center
Unistrut metal framing is often used to support rehabilitation equipment.

Unistrut design and installed boom support systems.

### Unistrut® 1\(\frac{5}{16}\)” Metal Framing

#### Unipier® Rooftop Pipe Support System
- Sleeper Support
- Model UP Strut Support
- M-RBS Roller for Model UP Strut Support
- Mounted Polycarbonate Base
- Elevated Support Polycarbonate Base
- Elevated Support Steel Base
- Mounted Polycarbonate Base

#### Unipier® Rooftop Pipe Support System - Fabricated Supports
- Mounted, w/Roller Polycarbonate Base
- Elevated Support, w/Roller Polycarbonate Base
- Elevated Support, w/Roller Steel Base
- Elevated Support [Roof Mount], w/Roller, Steel Base
- Spacer for Model 1.5, 3-R
- Support Pads & Deck Plates
- Polycarbonate Bases
- Steel Bases

#### Unistrut® Telestrut Telescoping Tubing

#### Telestrut Tubing

- P9000 (12 Ga.)
  - 1\(\frac{5}{8}\)” x 1\(\frac{5}{8}\)”
- P9200 (12 Ga.)
  - 1\(\frac{7}{8}\)” x 1\(\frac{7}{8}\)”

### Unistrut® Fiberglass Framing

#### Heavy Duty (Patented Flange Profile) 1¾” x 1¾”
- F20PV-2000
- F20PV-2200
- F20PV-2100
- F20PV-2300

#### Light Duty (Patented Flange Profile) 1½” x 1½”
- F20PV-1000
- F20PV-1100
- F20PV-1200
- F20PV-1300

#### Heavy Duty (SST Profile) 1¾” x 1¾”
- F20PV-2000 SST
- F20PV-22000 SST
- F20PV-2100 SST
- F20PV-23000 SST

#### Fiberglass Concrete Inserts
- Heavy Duty
- Standard Duty
- Light Duty

#### Hardware & Accessories
- Heavy Duty
- Standard Duty
- Saddle Clip
- Stop Lock
- Hex Flange Bolt
- Hex Bolt
- Hex Flange Nut
- Hex Nut
- Flat Washer
- Spacer
- Threaded Rod
- Rod Coupler
- End Cap
- Capping Strip
- U-Bolt
